Issue #1 April 2020

PRODUCT NAME: BoilerExit 1507**OTHER NAMES: None****DESCRIPTION**

BoilerExit 1507 is a specialised blend of chemicals designed to act as a one shot oxygen scavenger / dispersant / alkalinity improver product.

APPLICATION

BoilerExit 1507 aids in oxygen scavenging, and also in the formation of magnesium hydroxide which will assist in the rapid and efficient dispersion of suspended solids.

FEATURES AND BENEFITS

- Prevents boiler and feed tank corrosion.
- Improves boiler cleanliness.
- Liquid product for easy administering.

TYPICAL PHYSICAL & CHEMICAL PROPERTIES

Appearance	Brown Liquid
Odour	Pungent
SG/density	1.09 – 2.0
pH	12 - 13
Solubility in water	Completely miscible

DOSAGE REGIME

BoilerExit 1507 should be continuously fed into the feedwater to provide the most effective use of the chemicals. It can be fed directly into the boiler or into the feedwater tank. A residual sulphite level of 30 – 50 ppm should be maintained for low hardness <5 ppm water supply.

STORAGE & HANDLING

Wear appropriate PPE when risk of exposure can occur. Use in a well ventilated area and avoid contact with incompatible materials. Store in original containers and keep containers securely sealed. Store in a cool, dry and well ventilated area.

PRECAUTIONS

ROtek Australia maintains Safety Data Sheets on all its products. SDS should be read and understood by all users before use. BoilerExit 1507 can cause severe eye and skin damage. Use appropriate PPE to avoid inhalation and contact with skin, eyes and clothing. If contact occurs wash affected area immediately with water for at least 15 minutes. If swallowed do not induce vomiting. In all cases seek medical advice.
